EDUCATION

Vellore Institute of Technology

Bachelor of Technology in Computer Science and Engineering

- CGPA: 9.12/10.0

Chennai, TN

Aug. 2023 – May 2027

EXPERIENCE

Research Intern

May 2025 – July 2025

Vellore Institute of Technology, Chennai Campus

Chennai, India

- Worked on large-scale NLP and vision-language projects
- Implemented efficient information extraction and real-time visual analysis
- Fine-tuned GPT-2 and Gemma 3 1B using DPO for domain-specific tasks
- Experimented with LoRA and PEFT on LLaMA 3.1 8B

PROJECTS

Triplet Extraction for Knowledge Graphs | PyTorch, HF Transformers, Gemma 3

May 2025 – July 2025

- * Developed a 2 stage pipeline for subject-relation-object triplet extraction from technical literature using Google Gemma 3 4B
- * Extracted 673,421 triplets from 68,491 sentences
- * Scaled pipeline across local hardware, cloud GPU services and university HPC services

Video Proctoring using Vision Language Models | Gemma 3, HF SmolVLM, OpenCV

May 2025 – July 2025

- * Built an automated video proctoring pipeline utilizing SmolVLM 500M and Gemma 3 1B to classify subjects as "Distracted" or "Focused" with generated natural language justifications
- * Optimized the pipeline to process 30-second video segments in about 60 seconds, achieving a high-efficiency processing pipeline on constrained compute.
- * Evaluated LLaVa, Moondream and other large VLMs to determine the tradeoff between accuracy and latency

Smart Contracts for Indian PDS | Solidity, Foundry

August 2025 – Present

- * Developed a permissioned blockchain architecture using Solidity to securely model the grain lifecycle, ensuring traceability and transparency within the Indian Public Distribution System
- * Validated system integrity and workflow safety by rigorously testing gas optimization, latency, and storage invariants using Foundry on a Paris-compatible EVM.
- * Drafted a technical manuscript detailing the architectural details and contract efficiency metrics of the architecture, currently under internal review for publication.

TECHNICAL SKILLS

Languages: C, C++, Python, Solidity, LaTeX

Frameworks: PyTorch, Tensorflow, HF Transformers, Foundry, GTK

Developer Tools: Git, Google Cloud Platform, AWS, VS Code, IntelliJ

SOFT SKILLS

Communication: Public Speaking, Cross-Functional Communication

Leadership: Cross-Cultural Leadership, Team Building, Talent Scouting

Awards and Achievements: President, Aletheo VIT Toastmasters Club, Division Support Champion - Division F, District 120 Toastmasters, Triple Crown Award

Certifications: Dynamic Leadership Pathway (Toastmasters), Managing Globally, Leadership Foundations, Finance Foundations (LinkedIn)
